

Home SteamShower Checklist

Your luxurious SteamShower can be the easiest decision of your bathroom remodel

Follow this simple checklist to ensure that your new SteamShower delights and relaxes you.

Top 10 List for SteamShower Planning

1. SteamShower Size: No space is too small. The total size of your SteamShower enclosure can range from very small to an expansive enclosure. Answer these simple questions to determine what size your SteamShower will be.

- A. It will replace an existing tub: Yes ____ No ____
If yes, the size will be roughly 5' x 3'
- B. It will be included in a remodel: Yes ____ No ____
If yes, simply measure the existing space
- C. It will be included in a new home: Yes ____ No ____
Then the size is completely up to you,
simply ensure that the ceiling is no higher than 8'

2. The Enclosure: Doing these things will keep the billowing warmth of steam right where it needs to be.

- A. You will need to fully enclose your shower and install a steam-tight door.
- B. Plan ahead if you are going to include lighting in your new steam retreat so that electrical wiring can be installed before you close the walls. Use only waterproof, steam proof ceiling lights designed for high moisture and temperature levels.
- C. Does the space have a window: Yes ____ No ____
If yes, make it double paned.
- D. For ventilation, consider adding a louver panel in your shower glass.

☐

3. Where Will You Locate the Steam Generator: The steam generator is about the size of a briefcase and can fit easily into a number of places. It can be located very close to your Steam-Shower, or up to no farther than 60 feet from the shower. Decide early in your project what the best location is. Where will it go?

Closet___ Vanity___ Cabinet___
Heated Attic___ Basement___ Equipment Room___

☐

4. Include Seating: You will want a comfortable place to sit back, relax and feel the soothing benefits of steam. You may have enough space to build in a bench, or you may need something more compact. Which will you prefer?

A bench seat that is built into your shower _____
A seat that folds up out of the way _____

☐

5. Your Finish Materials: For the optimal SteamShower experience you need to consider the materials you use on the walls and ceiling. Some materials are more porous than others so this will affect the sizing of the steam generator you need. Materials for the surfaces of your steam room will be:

Ceramic Tile ___ Marble ___ Granite ___ Acrylic ___
Fiberglass ___ Porcelain ___ Glass Tile ___

☐

6. Choosing the Right Steam Generator: The right size generator for your space ensures that the perfect amount of steam fills the room while you relax in total comfort. Simply calculate the room volume, then multiply it by the percentage next to the finish material to be used. This will give you the total volume needed to select the right size generator. Or visit VirtualSpa.mrsteam.com and use our online calculator.

Height ___ x Width ___ x Length ___ = Room Volume ___
Natural Stone: Add 110% ___
Ceramic or Porcelain: Add 40% ___
Add Room Volume to Material = Total Volume ___

Home SteamShower Checklist

7. Choosing Your SteamShower Control, or Complete Control

Package: The choice is up to you, and so is the designer finish.

Simply choose the technology and functionality that fits your needs in a finish that compliments your décor.

Touch Screen (iSteam3) ____

Wireless (AirTempo) ____

Keypad Control (iTempo) ____

Each control also comes in a complete package to make the process simple, and save you money! You can select options à la carte to go with a steam control, but Packages make it so simple.

8. Select Your Steamhead: Steamheads come in traditional and linear shapes. Whichever you choose should be located 6" to 12" from the floor to ensure that steam fills the room. Place your control on a separate wall, away from your steamhead.

Linear ____ Single Exit Point ____

9. Therapies: For a full home spa and steam experience, consider including one or all of the following therapies that you can control through your steam system:

- A. Music: Stream your favorite music through in-shower speakers and a Bluetooth® sound system
- B. Chroma: Add a spectrum of color to your steam experience
- C. Aroma: Evenly infuse essential oils into your SteamShower

10. Voice Activation: With Alexa, your MrSteam SteamShower will be ready when you are. Start, set temperature, set duration and even stop your system from anywhere when SteamLinux is installed. When SteamLinux is installed, simply enable the SteamLinux skill for Alexa.

Just Ask Alexa Yes ____ No ____
